PERSONAL SKILLS
AND COMPETENCES

Acquired in the course of life and career but not necessarily covered by formal certificates and diplomas.

Over the years, I had great interest in Nuclear Cardiology and I have been publishing and followed upgrading courses with particular attention to arrhythmogenic dysplasia of the right ventricle. I have implemented diagnosis methods with marked leukocytes for inflammation in my operative unit. I have studied and applied the sentinel lymph node diagnostics to skin melanomas and breast cancer. I have studied Nuclear Neuroscience diagnostic with SPECT and PET. In the last few years I deepened to nuclear medicine therapies field , with particular interest in thyroid cancer, NETs, lymphomas, and skeletal metastasis. I had great interest in studying radio-immunotherapy with monoclonal antibodies and as last application, I contributed to develop the 177Lu therapy in metastatic castration resistant prostatic cancer.

I have participated in the following national and international scientific protocols, including a registrative one, as a co-experimentator and / or principal investigator in my unit:
